Voor het stellen van een juiste diagnose is een goede differentiële diagnose gebaseerd op anamnestische gegevens en bevindingen bij lichamelijk onderzoek essentieel. Daarbij is een consequente en systematische benadering noodzakelijk. Dit boek heeft zich vanaf de eerste druk, nu twintig jaar geleden, bewezen als een waardevol hulpmiddel bij dit proces. In deze herziene editie komen opnieuw alle aspecten van de interne geneeskunde aan bod. Veel hoofdstukken zijn herschreven door nieuwe auteurs. Nieuw is dat aan de lever een apart hoofdstuk is gewijd; hetzelfde geldt voor somatisch onverklaarde klachten. Zoveel als mogelijk is gebruik gemaakt van recente richtlijnen en standaarden. In eerdere edities werden het handboek en het compendium apart uitgegeven. In deze vijfde herziene editie is ervoor gekozen tabellen en figuren alleen in het compendium aan te bieden en niet meer in het handboek op te nemen. Zo zijn de beide boeken slechts tezamen te gebruiken en complementair aan elkaar. Differentiële diagnostiek in de interne geneeskunde is bedoeld voor huisartsen, internisten, studenten die co-assistentschappen lopen en voor arts-assistenten in opleiding tot internist of een aanverwant specialisme.

From the student preparing for a board certification examination to the acupuncturist and herbalist or other health care provider needing a ready reference, this text provides a clear and concise overview of hundreds of conditions and disorders.

This book is a textbook and clinical manual on the treatment of modern Western medical diseases with Chinese medicine. By modern Western medical diseases, we mean all the disease categories of Western medicine excluding gynecology and pediatrics. By Chinese medicine, we mean standard contemporary professional Chinese medicine as taught at the two dozen provincial Chinese medical colleges in the People's Republic of China. The two main therapeutic modalities used in the practice of this style of Chinese medicine are acupuncture-moxibustion and the internal administration of multi-ingredient Chinese medicinal formulas. Treatment plans for each disease discussed herein are given for each of these two main modalities.

Historically established patterns from the Shang Han Lun and Wen Bing are included in the lung section. These sections are supplemented by appendices listing original unmodified formulas, processing methods, delivery methods, contraindications for pregnancy, incompatible and antagonistic combinations, toxic substances, and medicinals derived from endangered species and animals. The 40-page index lists biomedical diseases and symptoms. TCM patterns are listed according to the same biomedical categories by which the book is organized. Formulas and medicinals are listed in both Pinyin and English with the main reference noted in bold. This work is arranged to provide easy access to the clinical information needed to treat a patient. The format, typography and page layout are designed for quick reference.

elkaar op de dansvloer. Een vrouw van middelbare leeftijd komt opnieuw bij de dokter, na twee
dagen eerder langs te zijn geweest met lichte uitslag op haar handen. De uitslag is inmiddels
paars geworden en als zweepslagen over haar hele lichaam verspreid. Een jonge
olifantentrainer uit een rondreizend circus die ooit een kopstoot kreeg van een zebra, wordt uit
het niets geteisterd door splijtende hoofdpijn, alsof iemand ‘een deur dichtslaat in z’n hoofd’.
In elk van deze zaken is de weg naar de diagnose – en de behandeling – er een vol bizarre en
soms onverklaarbare wendingen. In dit boek toont Sanders aan dat het stellen van de juiste
diagnose expertise, zorgvuldige procedures en soms een tikkeltje geluk vereist. Diagnose
plaatst ons in de schoenen van de dokter en laat ons deze meeslepende en soms
onnauwkeurige medische mysteries van dichtbij ervaren. Zie wat de dokters zien, voel hun
onzekerheid – en ervaar de euforie wanneer alles op z’n plek valt.
